

The past few years the agricultural sector has seen many changes. Profits per unit are decreasing due to liberalization and globalization. Many farmers respond by increasing the scale of their operations. The standards of various aspects of sow and fattener management have been upgraded in recent years particularly regarding hygiene, climate control and management. Proper analysis of one's own farm results and the implementation of improvements has become of the utmost importance and are the focus of this training program.

ADVANCED PIG PRODUCTION

FOR WHOM

- ⇒ Managers and assistant managers dealing with the management of integrated pig farms producing piglets for breeding and fattening
- ⇒ Extension officers
- ⇒ Professionals in the periphery of the pig business

TARGET

To obtain information, ideas, tools and skills to improve the technical and financial results of pig farms and of the production of fatteners; not only in terms of the highest possible production levels but also at the lowest possible cost price.

In addition insights will be gained into producing to the highest quality standards demanded in today's markets.
