

# ORIENTATION ON POULTRY PRODUCTION

Poultry farming throughout the world undergoes significant changes. New legislation and public concern addressing negative environmental effects of poultry farming as well as ethical issues such as animal welfare and medicine use, are gaining importance. In order to cope with these developments, changes in farm set-up and management have to be considered, as they may affect the income of the poultry farmer.

## FOR WHOM

Students in agriculture/general visitors.

## TARGET

Improve applied knowledge based on technology and equipment used in poultry farming for layers and broilers. Contribution to a better insight in poultry farming in the Netherlands.

## CONTENTS

This training program covers:

- ⇒ Poultry production in the Netherlands (meat/eggs)
- ⇒ Housing systems
- ⇒ Health, hygiene and decreasing of diseases
- ⇒ Feed and feeding systems
- ⇒ Climate control
- ⇒ Market and chain management

## COURSE

Our tailor-made courses of "Orientation in Poultry Production" consists of 3 days at CITAVERDE Bedrijfsopleidingen in the Netherlands. The program will contain lectures, practical exercises and several excursions to poultry farms in the Greenport Venlo.
